

In 2018 Malcolm Gunter passed away from Motor Neurone Disease. In his memory, MGF has raised over £200,000 and provided support and grants for many local people living with and affected by MND.

The Malcolm Gunter Foundation objectives

**Specialist
Medical Care**

**Family
Support**

**Support other
MND sufferers**

**Grants for
Research**

M G F MALCOLM GUNTER FOUNDATION

Getting his name on the map

Former client, Pat Wood of Truffle Shuffle, in an incredibly thoughtful and poignant gesture, installed two new official road signs in Avonmouth as a tribute to Malcolm. Malcolm's parents, Cyril & Molly proudly unveiling the signs.

THE FOUNDATION IN ACTION

HOW WE ARE HELPING

The Foundation has continued to provide practical support and financial assistance to people living with MND outside of their day to day direct medical needs.

Both directly and through our long-standing relationship with MND, we have been able to provide over 30 grants and support 20 families across the South West.

Help ranges from providing iPads and communication aids, complementary health and access to dietary advice, specialist transport and counselling & bereavement support.

In one case we have been able to fund a programme of acupuncture sessions for 'Ms W' of Portishead who has been so grateful for the improvements to her physical mobility and symptomatic relief that the treatment brings as she struggles with the onset of the disease.

We have helped a number of individuals and their families in providing various home improvements to make their lives just a little bit more manageable and enjoyable.

By way of example, we funded the installation of a new, fully accessible wet room and wheelchair ramps throughout a house for 'Mr P' in Weston Super Mare. His wife commented "We cannot thank you enough for such a generous grant. It will make such a difference to him being able to access the outside world in his wheelchair".

We continue our support for the vital work that Weston Hospicecare does at a critical point in people's lives and for their work with the bereaved including provision of adaptive technology and transportation to group activities and therapy.
